

Please note that market data is now updated in an addition at the end of the main report.

DRUG DISCOVERY & GENOME RESEARCH

CONTENTS

1. Introduction & Purpose	1
1.1 Position of Research	1
1.2 Rational versus Empirical Investigations	4
1.3 Genomics & Proteomics	8
1.4 Technologies & Analysis	11
2. Philosophy & Implementation of Drug Discovery Processes	16
2.1 Why there is a Need	16
2.2 How the Need is Met	23
2.3 Trends & Issues	32
3. Products & Services Used in Genomics/Proteomics & Drug Discovery	44
3.1 Product Segmentation by Applications	44
3.2 Product Segmentation by Type	48
3.2.1 Reagents & Arrays	50
3.2.2 Equipment & Consumables	71
3.2.3 Services	85
3.2.4 Bioinformatics	87
3.3 Suppliers & Commercial Development of the Industry	89
3.4 Profiles of Suppliers in the Industry	95
4. End User Customers	122
4.1 Customer Segmentation	122
4.2 Life Science Research Customer Profiles	138
4.3 Pharmaceutical R&D Customer Profiles	149
5. Market Description & Dynamics	156
5.1 User Needs	156
5.2 Basis of Competition	161
5.3 Definition of Markets	164
5.4 Key Trends	166
5.5 Regulatory Influences	169
5.6 Current Market Quantification & 5 year Projections	170

6. Future Developments & Business Opportunities	202
6.1 Technology Developments	202
6.2 Segment Developments	206
6.3 Regional Developments	208
6.4 Regulatory & Political Developments	209
6.5 Strategic Options & Business Opportunities	210

7. Conclusion	213
----------------------	------------
