Life Science Research Markets and Analyses: Europe, Middle East & Africa – EMEA 4th Edition

Huckle D,

Adams Business Associates: Global Library of World, National and Regional in depth Information and Market Analyses – 4th Edition – 2020.

There are four (4) self-contained, individual country reports in this 4th Edition series of the ABA Global Life Science Research Library. These are

- **4th Edition of the Western Europe Global Library Report, ABA 374.4 - at £ 3,500 and was completed in April.**
- **4th Edition of the Central & Eastern Europe Report, 360.4 - at £ 3,000 and was completed in early May.**
- **4th Edition of the Middle East, Arabia & North Africa ABA 348.4 – at £ 3,000 and was completed in June.**
- **4th Edition of the Sub-Sahara & South Africa ABA 365.4 - at £ 3,000 and was completed in mid-July.**
- **These are each available, in either printed and/or PDF format: PDF versions of the Contents List can be sent if requested to ABA and are on the ABA web site at www.aba-business.com . [All prices are for Multi-site licences]**

Target audience: Chief executives, marketing and sales managers, business development managers, investors and analysts.

These are the last reports that will be prepared for the ABA Global Library of Life Science analyses. They will be complemented by further reports each of two volumes dealing with Asia Pacific and with the Americas by the end of 2020. Each of the four EMEA region reports has been fully and newly researched so that market data is to the end of 2021 as the base line with events in 2020 highlighted.

NOTIFICATION – Covid 19 Virus Impact.

The forward projections are those that had been proposed by Governments and individual companies in their business forecasts. The projections for 2026 are based on the belief that over the following six years the current impact will be recovered and stimulation applied to the economies, including research.

Each report covers Reagent and Equipment Markets within the particular region by profiling development Political, Demographic, Investment, Technology Status, Healthcare Structure and Life Science Research Activities of individual countries and their overall global status. Commercial development and Funding Requirements and Sources are related to the focus of Life Science research, emerging products and companies.

The Research Market Quantification is discussed with segment distribution, product descriptions and market and competitors distribution outlets.

The 100 countries covered in these four reports are individually:

ABA 348.4 (20 countries): Asia Minor countries of **Cyprus, Greece, Iran, Israel, Syria, Lebanon** and **Turkey.**

Arabian Peninsular countries of **Jordan, Kuwait, Oman, Qatar, Saudi Arabia, United Arab Emirates & Bahrain.**
